<b>)</b>	
<b>)</b>	Reg. No. :
	neg. no.
	14004
	Question Paper Code: 11334
	B.E./B.Tech. DEGREE EXAMINATION, NOVEMBER/DECEMBER 2012.
,	Fifth Semester
<b>)</b>	Electronics and Communication Engineering
i .	EC 2304/EC 54 - MICROPROCESSORS AND MICROCONTROLLERS
	(Regulation 2008)
	(Common to PTEC 2304 – Microprocessors and Microcontrollers for B.E. (Part-Time) Fifth Semester Electronics and Communication Engineering – Regulation 2009)
3	Time : Three hours Maximum : 100 marks
•	Answer ALL questions.
•	PART A — $(10 \times 2 = 20 \text{ marks})$
,	<ol> <li>How clock signal is generated in 8086 microprocessor?</li> </ol>
	2. State the function of queue status lines $QS_0$ and $QS_1$ in 8086 microprocessor.
	<ol> <li>How will carry and zero flags reflect the result of the instruction CMP BX, CX?</li> </ol>
	<ol> <li>Give any four miscellaneous instructions in 16 bit microprocessor.</li> </ol>
	<ol><li>List the four Display modes of 8279 keyboard/Display controller.</li></ol>
	<ol> <li>What are the enhanced features of 8254 Programmable timer compared to 8253?</li> </ol>
•	<ol> <li>Specify the size of memory systems used in 8051 microcontroller.</li> </ol>
	8. Mention the different operand types used in 8051 microcontroller.
	<ol> <li>State the use of I<sup>2</sup>C bus standard.</li> </ol>
)	10. What is the use of PWM in motor control using microcontroller?
	PART B — $(5 \times 16 = 80 \text{ marks})$
,	11. (a) (i) Explain the architecture of 8086 microprocessor. (8)
)	(ii) Discuss about the different data transfer schemes with examples. (8)
•	Or
<b>)</b>	OI .
5	(b) Describe the maximum mode signals, bus cycle and maximum mode
9 9 8 8 9	(b) Describe the maximum mode signals, bus cycle and maximum mode

				Comment of the last of the las	
12.	(a)	(i)	Discuss about the 8086 instructions used for transferring data between registers, memory, stack and I/O devices. (8)		
		(ii)	Write a Program based on 8086 instruction set to multiply a constant value to a sequence of data from 1 to n stored in memory.  (8)		
			(0)		
			Or		
	(b)	(i)	Write a Program based on 8086 instruction set to compute the average of 'n' number of bytes stored in the memory. (8)		
		(ii)	Discuss about the use of various assembler directives in 8086 microprocessor programming. (8)		
13.	(a)	Evn	lain the programming and operating modes of 8255 PPI in detail. (16)		
2.07+	(44)	3,000	Or		
	(b)	(i)	With diagram, explain the operation of R-2R method of D/A converter. (8)	C	
		(ii)	Explain the function of CRT terminal interface. (8)		
14.	(a)	(i)	Explain the parallel port architecture of 8051 microcontroller. (8)		
		(ii)	Explain the operation of Serial port with associated registers. (8)		
			Or	<b>C</b> .	
	(b)	(i)	With example, Explain the arithmetic and branching instructions of 8051 microcontroller. (8)		
		(ii)	and a second instruction set to pack array of		
15.	(a)		th neat sketch, explain the microprocessor based Traffic Light control		
		System.	stem.	<b>(1)</b>	
	(b)		Or		
		Describe in detail the microcontroller based system design with a example.	· Sections
